Company Profile

Proficient for Consulting, Training and Project

PROFICIENT

About Us

Proficient is a multi-disciplinary organization dedicated to driving organizational success and global trade connectivity. As a modern partner in an evolving marketplace, we bridge the gap between strategic efficiency, human potential, and

high-quality commerce. We specialize in providing the tool, knowledge, and products necessary for organizations to thrive in local and international markets

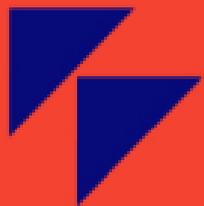

To empower our customers through efficient consulting and training services, enhancing employee capabilities to ensure smooth strategic execution.

By delivering premium products to local and international markets, we commit to sustainable growth and operational excellence. Our philosophy is rooted in mutual respect and high commitment, reflecting a self-concept of a trusted industry benchmark. We act with a deep concern for our public image, fostering social responsibility and community trust in everything we do.

Mission

Vision

The global benchmark for operational excellence, empowering growth through transformative training and seamless international trade

To be a leading consulting and project management firm recognized for precision, reliability, and delivering measurable results.

Consulting Services

We provide strategic and operational consulting services designed to enhance organizational performance and governance, including:

- Organizational assessment and performance diagnostics
- Strategy development and implementation support
- Operating model and process optimization
- Change management and transformation initiatives
- Governance, risk, and compliance advisory

Trade & Export Services

- Direct sourcing of premium products based on specific customer specifications and quality standards
- Rigorous inspection protocols to ensure every shipment meets the benchmark
- Aligning the product portfolio with evolving needs and market trends

Project Management

We support organizations in delivering projects successfully through structured and disciplined project management services, including:

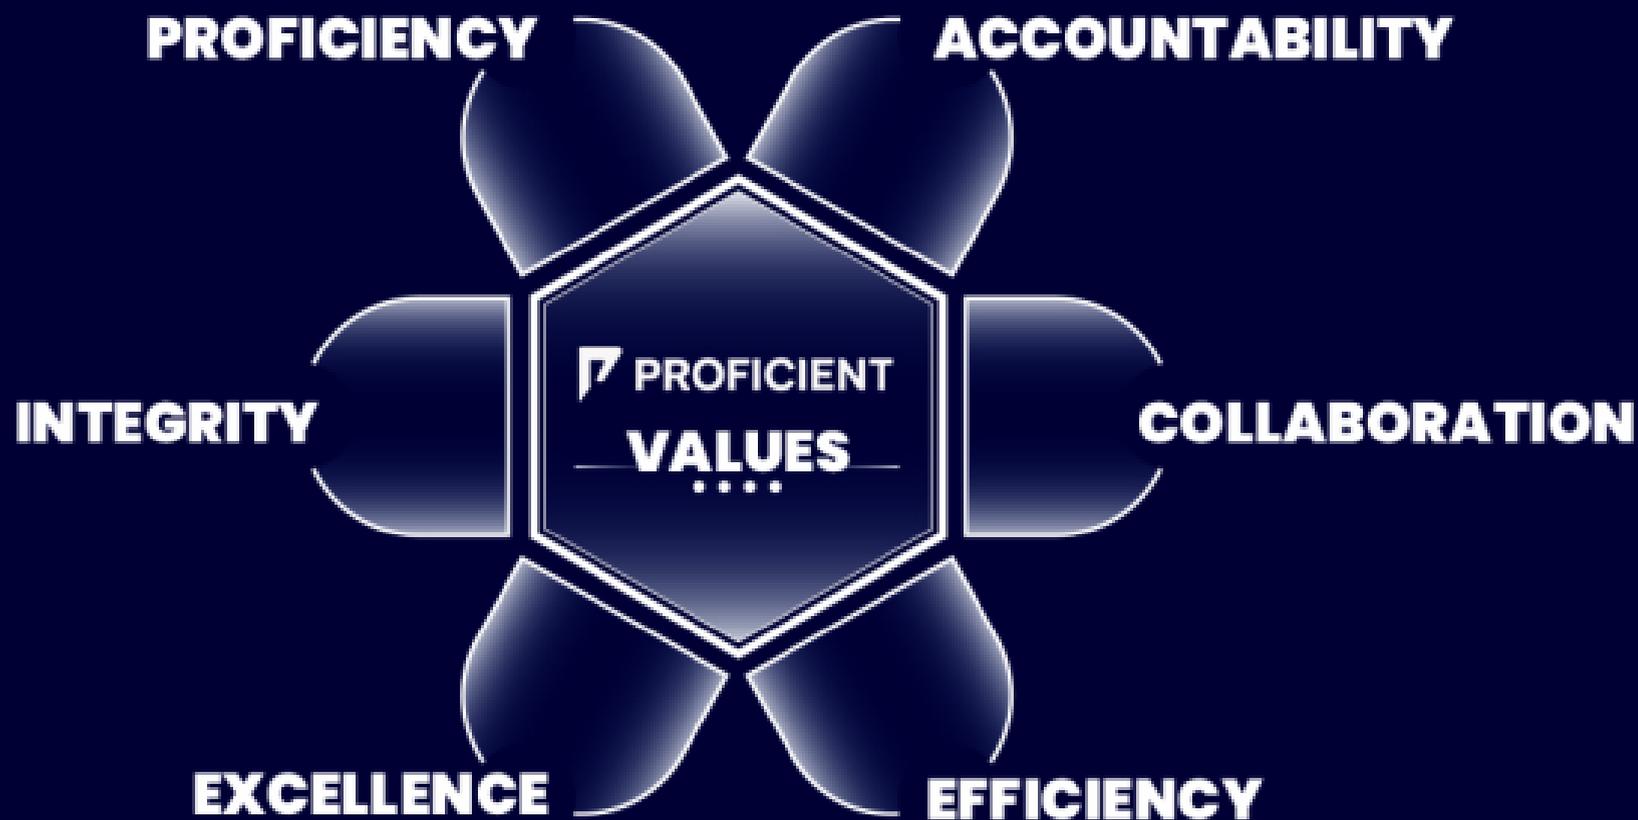

- End-to-end project planning and delivery
- Establishment and enhancement of Project Management
- Project governance frameworks and controls
- Risk, quality, and stakeholder management
- Performance monitoring, reporting, and decision support

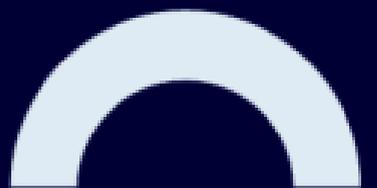

Training & Capability

We design and deliver professional training programs that build individual and organizational capabilities, including:

- Executive leadership and management development
- Professional and business skills training
- Customized corporate and sector-specific training programs
- Capability building aligned with organizational strategy

Purpose

Proficient empowers organizations to perform, deliver, and grow through expert consulting, capability development, project management, and trade solutions.

Proficient exists to empower organizations and professionals to achieve measurable excellence by delivering practical consulting, capability-driven training, disciplined project management, and reliable trade & export solutions.

We bridge strategy with execution, knowledge with application, and local expertise with global markets—helping our clients build strong capabilities, optimize performance, deliver successful projects, and expand sustainably across borders.

Through proficiency, integrity, and results-focused solutions, Proficient enables growth, resilience, and long-term competitive advantage.

Core Pillars of Excellence

- **Operational Excellence & Consulting:**

We deliver high-level advisory services designed to streamline workflows, eliminate waste, and ensure that corporate strategies are executed with precision and confidence.

- **Capacity Building & Training:**

We provide specialized educational programs across diverse sectors, upskilling workforces to run complex operations with "smooth strategy" and sustainable results.

- **Global Trade & Export:**

We serve as a trusted bridge to the world, feeding both local and international markets with a curated portfolio of professional-grade products that meet the highest quality standards
